

FULL THROTTLE

Jeff Connolly was disabled from a herniated disk with pressure on his spinal cord. Dr. Paul McAfee and his team did a PCM disk replacement at C5-6 and now he is head of the Dragster FullThrottle Racing Team.

“Hi Dr. McAfee, this is Jeffrey Connolly. I am one of your patients running around with your PCM device. Forgive my delay... been really busy. Anyway, here are some pics of me in action and a picture of one of the cars I machine components for.”
